The bedrooms feature built-in wardrobes, and the entrance door is reinforced for added security.
Comfort is guaranteed thanks to a ducted hot/cold air conditioning system, aerothermal hot water production with photovoltaic support, and PVC exterior joinery with double glazing, ensuring excellent thermal and acoustic insulation. Quality is also evident in the finishes: premium ceramic flooring, smooth wall finishes, bathrooms featuring thermostatic taps in the master suite, vanity units, and carefully selected materials that create a contemporary, elegant look. The building also holds a B energy rating, reflecting an efficient design that helps reduce energy consumption and CO emissions.
The communal areas further enhance the living experience. The fully enclosed, private complex features an outdoor pool with night lighting and a sun deck, a fully equipped gym, a social-gourmet room for gatherings and celebrations, landscaped gardens, and infrastructure ready for electric vehicle charging. Everything is designed so you can enjoy your leisure time without leaving home.
